

KPL Single Button Scene Rotation

Paul Jaruszewski / www.melor.com / kd6lor1@cox.net

Step by Step Instructions

- Create Scenes / Create Control
- Link control to button status scene
- Create programs **F1** and **F2** as status control flags.
- Create 4 programs as below and double click program if desired.

How it works: When you click on the KPL button, one of the 4 buttons runs depending on status of the flags. The program that runs will alter the flags so the next program runs on the next click. When you double click (fast on/off) the flags reset and the status light goes off and the 5th scene is activated.

<p>Program 00</p> <pre> If (Control 'SceneButton' is switched On Or Control 'SceneButton' is switched Off) And Program 'F1' is False And Program 'F2' is False Then Set Scene 'scOne' On Run Program 'F1' (Else Path) Run Program 'F2' (Then Path) Set Scene 'ScButtonStatus' On Else - No Actions - (To add one, press 'Action')</pre>	<p>Program 01</p> <pre> If (Control 'SceneButton' is switched On Or Control 'SceneButton' is switched Off) And Program 'F1' is False And Program 'F2' is True Then Set Scene 'scTwo' On Run Program 'F1' (Then Path) Run Program 'F2' (Else Path) Set Scene 'ScButtonStatus' On Else - No Actions - (To add one, press 'Action')</pre>	<p>Program 10</p> <pre> If (Control 'SceneButton' is switched On Or Control 'SceneButton' is switched Off) And Program 'F1' is True And Program 'F2' is False Then Set Scene 'scThree' On Run Program 'F1' (Then Path) Run Program 'F2' (Then Path) Set Scene 'ScButtonStatus' On Else - No Actions - (To add one, press 'Action')</pre>	<p>Program 11</p> <pre> If (Control 'SceneButton' is switched On Or Control 'SceneButton' is switched Off) And Program 'F1' is True And Program 'F2' is True Then Set Scene 'scFour' On Run Program 'F1' (Else Path) Run Program 'F2' (Else Path) Set Scene 'ScButtonStatus' On Else - No Actions - (To add one, press 'Action')</pre>
<p>Program F1</p> <pre> If - No Conditions - (To add one, press 'Schedule' or 'Condition') Then - No Actions - (To add one, press 'Action') Else - No Actions - (To add one, press 'Action')</pre>	<p>Program F2</p> <pre> If - No Conditions - (To add one, press 'Schedule' or 'Condition') Then - No Actions - (To add one, press 'Action') Else - No Actions - (To add one, press 'Action')</pre>	<p>Program DoubleClick</p> <pre> If Control 'SceneButton' is switched Fast On Or Control 'SceneButton' is switched Fast Off Then Set Scene 'scFive' On (or use SetScene 'sc1-4' OFF) Run Program 'F1' (Else Path) Run Program 'F2' (Else Path) Set Scene 'ScButtonStatus' Off</pre>	<p>Scenes:</p> <pre> scButtonStatus – Determines LED status on KPL scOne - Dim scTwo - Bright scThree - Bright scFour – All On scFive – All OFF or use one of the other scenes but select off</pre> <p>Control</p> <pre> SceneButton – Link to button on KPL</pre>
